Re: Instructions for Continued Airworthiness (IFCA)

Reference FAA Order 8110-42, current revision

To whom it may concern:

All Aircraft Battery Shop FAA-PMA parts are designed to be equivalent in form, fit and function to the Type Certificate (TC) holder products as well as all FAA-PMA holders' part(s).

The instructions for continued airworthiness, presently acceptable to the FAA, for the TC holder are valid for use on the Aircraft Battery Shop LLC FAA-PMA part(s).

All Aircraft Battery Shop LLC FAA-PMA approved parts are to be stored, shelf life and tested per the original equipment manufacturer (OEM) component maintenance manual (CMM).

Kind Regards,

Sandra F. Witbeck
